

GFL3000

Catalog Number: *GFL3000*

Product Type: *Ground Fault Locator
(Locates Nicks & Cuts in Buried Wire)*

Applications:

The GFL3000 Ground Fault Locator detects hidden damage to buried cables, a common problem. With its dual voltage output, the GFL3000 pinpoints ground faults where wiring has been exposed to ground. The appearance of the transmitter's powerful charge at a fault is detected by the GFL3000 receiver. Buried faults can then be pinpointed by following the receiver's meter directional kicks.

Description:

The GFL3000 offers troubleshooting features including dual sensitivity. There is continuous battery status display when operating. The box contents include: GFL3000R Receiver, GFL3000AF Receiving Frame, GFL300T Transmitter/Carrying Case, GFL3000ST Ground Stake.

Specifications:

- Locates Ground Faults (cuts & nicks) in Buried Wires
- Dual Sensitivity (Hi/Lo volts)
- Audible 'On' Beeper
- Custom Molded Case
- Rechargeable Battery (Includes Battery, AC and DC Chargers)
- Weight: 12 lbs with case, 2 pieces
