

PM-50

PM-30

Catalog Number: *PM-50 Kit, PM-30 Kit*

Product Type: *Metering*

Applications:

Provides temporary or permanent metering of electrical power at 30 or 50 ampere RV sites. Portability allows for metering of "select" sites on an as-needed basis. Ideal for two tenants sharing a single pedestal where electricity usage needs to be separated for billing. May also be used as a meter tester to verify if existing site meter is registering accurately.

Description:

Simple cord connection and meter socket mounting ease make installation user friendly. Just mount meter socket on back of existing timber post, pedestal or tree-type stake, install meter in and re-connect the plugs. Meter kits include: UL listed meter socket, snap ring, security seal, mounting hardware and installation instructions. Meter sold separately.

Specifications:

- PM30: 30 amp 120 volt with NEMA TT30 molded receptacle with 48' molded male plug cord.
- PM50: 50 amp 120/240 volt with NEMA 14-50 receptacle in enclosure with 54" molded male plug cord.
- Heavy duty flexible insulated cords with weatherproof strain reliefs
- Weight: PM30 5 lbs, PM50 11lbs
- Meters: PM30 uses 120v EZ read numeric (DEM). PM50 uses solid state electronic LCD display (SSEM)
