

**PRO871C**

**Catalog Number:** *PRO871C*

**Product Type:** *Underground Cable Locator with Inductive Clamp*

### ***Applications:***

The Pro871C Underground Cable Locator is a full featured, low cost underground locator. Incorporating three different locating frequencies. The Pro871C tracks many types of cabling, including CATV, electrical, telephone and lighting. Simply connect the transmitter to ground and the wire to be tracked and turn it on. Follow the beeps with the receiver using the visual meter, external speaker, or headset.

### ***Description:***

The Pro871C has increased inductive capability with the IC4 inductive clamp, injecting 5 times more tracing power into a cable than original models. Inductive locating (clamp or broadcast) allows non-contact connection of tracing signal over active electrical circuits, avoiding dangerous electrical voltages or expensive sub-contractor fees.

### ***Specifications:***

- Design for Enhanced Inductive Locating
- Two Direct Connection Frequencies (2 kHz, 33 kHz)
- Two Inductive Modes, Antenna or Tuned Inductive Clamp IC4
- Passive 50/60Hz AC Tracking
- Selectable Null or Peak Reception for Pinpointing
- Stereo Headset
- Audible (speaker or Headset or Visual Signal Indicators)
- Low Battery Indicator
- Slim, Custom-Molded Steel Spine Case
- Weight/Size: 8 pounds, 29 x 12 x 5

***Open 8:30AM - 5PM Coast to Coast***
